PROFILE

Entry-level Java Full Stack and MERN Stack Developer with hands-on internship experience in Spring Boot, REST APIs, React.js, and Node.js. Proficient in building scalable full-stack web applications with JWT-based authentication, RESTful API design, and relational database management. Experienced in Agile team environments with strong problem-solving and communication skills. Seeking a Software Developer role to contribute to end-to-end web solutions.

TECHNICAL SKILLS

Languages: Java, JavaScript
Technologies: Spring Boot, Spring Data JPA, Hibernate, Node.js, Express.js, REST APIs, JWT, MVC Architecture
Frontend: React.js, Angular, HTML5, CSS3, Responsive Design
Database: MySQL, PostgreSQL, MongoDB
Tools & Platforms: Git, GitHub, Postman, VS Code, Eclipse, IntelliJ IDEA
Soft Skills: Leadership, Team Collaboration, Communication, Problem-Solving, Time Management

INTERNSHIPS

Java Full Stack Intern | The Kiran Academy, Pune Jun 2024 – Jul 2024

- Developed frontend and backend modules using Spring Boot, REST APIs, and MySQL following MVC architecture and OOP principles.
- Gained practical experience in database integration, SDLC practices, and earned appreciation certificate for technical skills and dedication.

MERN Stack Developer Intern | P Intellects Info Solution Pvt. Ltd, Pune Jan 2025 – Feb 2025

- Built and deployed full-stack web applications using MongoDB, Express.js, React.js, and Node.js with RESTful API integration.
- Implemented responsive UI components, scalable backend architecture, and database management for production-ready web solutions.

PROJECTS

LifeTrace – Blockchain-Based Organ Donor Registry & Matching System | Spring Boot, React, MySQL, JWT, Polygon, IPFS | GitHub Final Year Project

- Built a full-stack decentralized healthcare platform connecting donors, recipients, and hospitals with role-based access control (Admin / Hospital / Donor / Recipient), JWT authentication, OTP email verification, and an organ matching engine based on ABO blood group compatibility and recipient prioritization scoring.
- Integrated Polygon Amoy blockchain via Web3j to record donor consent and transplant events as tamper-proof on-chain transactions; stored consent documents on IPFS via Pinata for decentralized, verifiable storage. Deployed frontend on Netlify and backend on Render with QR-code-based on-chain verification.

Employee Management System | Spring Boot, React, MySQL, JWT, REST APIs | GitHub

- Developed a full-stack EMS with JWT-based authentication, role-based access control, and automated email notification service for employee events.
- Designed and tested 10+ RESTful APIs using Postman; applied OOP and exception handling for robust data consistency and error management.

Online MCQ Exam Portal | Angular, TypeScript, Spring Boot, MySQL | GitHub

- Built a full-stack exam platform where admins create and manage timed quizzes; students attempt exams with secure login and receive instant results.
- Implemented responsive UI with Angular, Spring Boot backend with REST APIs, and MySQL for structured data storage and retrieval.

EDUCATION

B.E. Information Technology – Savitribai Phule Pune University CGPA: 6.7 | 2022 – 2026

HSC (Science) – Maharashtra State Board, Karjat 2022

SSC – Maharashtra State Board, Karjat 2020

CERTIFICATIONS

- **Java Full Stack Certification** – Symbiosis Skills & Capgemini Program, 2024
